

Call for Presenters

The 12th Annual Space Protection Conference is calling for presenters for the August 24-26 conference at Kirtland AFB. The conference will focus on existing and future technologies for space protection. Session topics include:

- Threats to US Space Systems
- Next Generation Space Systems and Technologies
- Space Situational Awareness Technologies
- Defensive Space Control Systems and Technologies
- Modeling and Simulation for Defensive Space Control and Space Situational Awareness
- AF Cyber Threats related to space assets

The presentations will be 30 minutes, including questions. There will be no papers for this conference. The first two days (24-25 August) will be held at the Secret, US Only level. A third day session will be held on 26 August for those with appropriate clearances. Space is limited for the third day, contact Joseph Chavez for information.

Submit all presentation abstracts by 30 June 2010 to:
