# Public/Private Partnerships: A New Model for Defending the Nation Summit

Monday, September 9, 2013

at

Wentworth Marriott

588 Wentworth Rd, New Castle, NH 03854

This year's summit will increase the synergy across local, state, and federal government agencies, industry and academia, focusing on the cyber and net-centric challenges facing the U.S. The goal of the summit is to explore techniques for 'whole of government' and complementary relationships that optimize a cross-flow of technologies and systems to enhance operational capabilities. Technology applications, system options, and best practices from various organizations will be examined. Panels will identify both critical problems and innovative approaches in information sharing and coordination for preventing and responding to terrorist and cyber attacks. Invited speakers from emergency management, law enforcement, health services, port security, and cyber security, as well as from various critical infrastructure sectors.
