

AOC JAPAN CHAPTER 5TH EW RESEARCH GROUP CONFERENCE

The AOC Japan Chapter Hosted the 5th EW Research Group Conference on April 22 in Kikai-Shinko-Kaikan, Tokyo. It has been co-sponsored by the IEICE (The Institute of Electronics, Information and Communication Engineers) Japan, Technical Committee on Space, Aeronautical and Navigational Electronics (SANE).

The EW Research Group of the AOC Japan Chapter is established to promote the exchange of new ideas and information, and the dissemination of the new research and knowledge in the fields of Electronic Warfare throughout the Japanese industry, academia and government. This aim is accomplished through technology conferences enabling Japanese and friendly nations' researchers to discuss the EW issues.

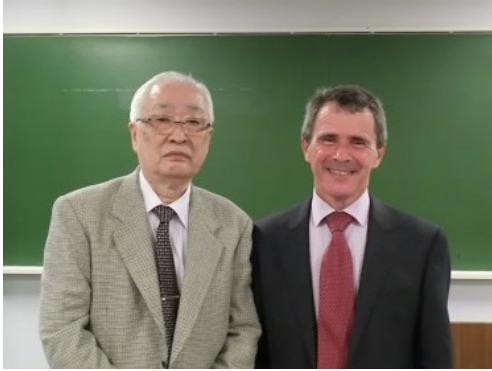

At the conference, AOC Japan Chapter President Mr. S. Kazama, an AOC Lifetime Service Award recipient, welcomed the 150+ attendants from Japanese industries, academia and government.

A keynote speech was presented by Dr. R. Andrews, an AOC board member, on EW and Cyber in a Changing World. It was preceded by the keynote speeches on Positioning EW in the Defense and Historic Transition of EW Concepts and Essence of EMS Operation, and the technical session presentations.

At the conference, the Japanese versions (Tokyo Denki Univ. Press) of “EW101, 102 and 103” (originally by David Adamy, Artech House) were presented and sold by the publisher booth.
