

ASSOCIATION  
OF OLD CROWS

## Electronic Warfare Working Group

Invites you for a panel discussion on

### Electromagnetic Spectrum

#### Perspectives from DoD, FAA, NASA, NTIA, and A&D Industry Reps

All wireless technologies require spectrum. In order to know one's location, to sense and avoid other aircraft, and to communicate in today's world, radio frequency spectrum is critical. Devices using unlicensed and cellular spectrum are both posing challenges and creating opportunities for the government. Congress is considering many legislative proposals regarding this crucial resource. Please join us for an informal conversation on spectrum policy, and why it's an important issue for Congress.

#### Speakers include:

**Fred Moorefield**, Director, Spectrum Policy and International Engagements, DOD CIO

**Paige Atkins**, Associate Administrator, NTIA (invited)

**Brig. Gen. Edward A. Sauley III**, Deputy Director, Operations for Joint Electromagnetic Spectrum Operations, USSTRATCOM (invited)

**Victor Sparrow**, Director, Spectrum Policy and Planning, NASA

**Ian Atkins**, Director, FAA Spectrum Engineering and Policy

**Jennifer Warren**, Vice President, Tech Policy & Regulation, Lockheed Martin Corporation

**Coffee and light refreshments will be served.**

**Tuesday, June 21, 2016**

8:00 am to 9:30 am

**2212 Rayburn House Office Building**

*In cooperation with the Association of Old Crows and the Aerospace Industries Association  
This is a widely attended event*

Please **RSVP** to **[ken@kmsadvocacy.com](mailto:ken@kmsadvocacy.com)**
