

Granite State Roost Hosts Nashua Country Club Curling Event

In February, the Granite State Roost held their curling event at Nashua Country Club. Almost 20 attendees came out to enjoy the ice. We began with instruction on the uses of each type of “shoe.” One shoe is used to slide on the ice; the other shoe is to prevent slipping on the ice. Those used for sliding made the ice slipperier than when on ice skates! We all learned the techniques for “throwing” the stone, sweeping and scoring. Even though it was cold, we all warmed up soon enough! After the training, teams were created, and games were played; competition was fierce! Boxed lunches with a variety of sandwiches to choose from were served after the slippery fun.

Granite State Roost’s next outing is planned for June at a Fisher Cats baseball game in Manchester, a dinner cruise on Lake Winnepesaukee in July, and to finish off the year, our annual holiday party in December. Tech talks will be sprinkled among these events, if allowed, due to the current circumstances. The Granite State Roost maintains a strong commitment to advancing knowledge of Electronic Warfare and Electromagnetic Spectrum Operations (EMSO) by inspiring local industry to contribute their skills and products to serve the EW Community. The Granite State Roost continues to provide opportunities for interaction among its membership by holding social events throughout the year.

For additional information about Granite State Roost, contact the chapter president, Mr. Duane Beaulieu, at duane.a.beaulieu@baesystems.com.

Everyone stay healthy, and we’ll have fun together soon enough!
